

Package ‘confeR’

November 3, 2025

Version 0.1

Date 2025-11-03

Author Peter Degen [aut, cre] (<<https://orcid.org/0009-0004-0706-9200>>)

Maintainer Peter Degen <peter.degen@uzh.ch>

Title confeR

Description Implements Bayesian conjugate analysis for federated inference as described in Degen et al. (2025) <[doi:XXXXXXXXXXXX](#)>.

R topics documented:

bca_iterate_sites	2
bca_oneshot	2
tidy_results	3
Index	4

bca_iterate_sites	<i>BCA iterate over local sites</i>
-------------------	-------------------------------------

Description

Pre-processing wrapper for BCA methods.

Usage

```
bca_iterate_sites(
  outcome,
  covariates,
  Method,
  data_split,
  use_local_intercepts,
  center_name = NULL
)
```

Arguments

outcome	Outcome vector y
---------	------------------

Value

List over all local sites with transmitted summary statistics

Author(s)

Peter Degen

bca_oneshot	<i>BCA one-shot</i>
-------------	---------------------

Description

Perform one-shot computation

Usage

```
bca_oneshot(
  bstats,
  n_sites,
  use_local_intercepts,
  use_local_variances,
  family,
  covariates,
```

```
epsilon = 1e-10,  
center_name = NULL,  
CI = "normal",  
return_post_params = FALSE,  
alpha = 0.05  
)
```

Arguments

bstats List of summary statistics returned by bca_iterate_sites

Value

List of oneshot parameter estimates

Author(s)

Peter Degen

tidy_results	<i>BCA tidy results</i>
--------------	-------------------------

Description

Tidy results from one-shot

Usage

```
tidy_results(params_oneshot, use_local_intercepts)
```

Arguments

params_oneshot Parameters returned by bca_oneshot

Value

Dataframe

Author(s)

Peter Degen
